🃜 Buy now - \$129

PicturesToExe Essentials

The Essentials Edition allows you to make stunning audio visual slideshows with minimum input and also to explore some of the more creative aspects.

Making A Basic Av Using Pro Show Gold

<u>A Few Things To Ponder.</u>

What is the purpose of the Av ?

- 1. A Family Slide Slow In DVD Format
- 2. Recording An Event. Produced as a DVD or Exe File. Could Enter In C.C. Competition ??
- 3. Theme Type Av. Need to Stand Out For the Judges.
- 4. An Av That Tells A Story With A Beginning, Middle & End. This Type Is Needed If You Intend Scoring A High Mark.

More points To Ponder !!

Some Faults

- 1. The Music Must Suit The Av Theme or Tempo.
- 2. When Publishing The Exe File Untick The Controls. Play, Pause, FF etc. Looks Bad.
- Avoid Padding. Quality Better than Quantity. Just Because You took 4000 shots. No Need to fit them all in the Av !

Post Processing

- Make sure the image is the best it can be by processing it in Photoshop, Light Room or even Faststone or Similar Freebie. Leave Out Softies !!
- 2. Don't Over Sharpen Your Final Image As it Will Be Magnified In Final Screen Shot.
- 3. Make sure Each Music Track is Roughly the Same Volume. Nothing Worse Than The Levels Going Up & Down.

Basic Organization For An AV Presentation No Matter What Program You Are Using ! Keep All Your Eggs In The One Basket. It takes a little thought but you will be working out of the one folder for all operations, pictures, Music, Including saving the exe file. All In The One Place

Create One Folder For All The Av Components

										~
⊖ ⊖ F Libraries → Pictures →						✓ 4→ Search Pictures			Q	
Organize 🔻 😝 Open	Share with 🔻 Slide show	E-mail B	urn New folder						• • •	0
 Favorites Desktop Downloads Recent Places Dropbox Libraries Documents 		Pictures libi Includes: 2 location	rary ons	2012	2013	2014	2015	Arrang	e by: Folder ▼	
	E	Digital Entries 2015	Graeme JohnsonNewGuin	Lightroom	NVIDIA Corporation	PayntersPassport Pics	Sample Pictures	Steam Rally		
Computer Compu	Dump Pictures, Music, Sound Effects and Save Exe File here as well									
Steam Rally Date m	nodified: 15/07/2016 10:50 PM									

You can copy the whole folder and transfer it to a mem. stick or someone else's computer. The PROGRAM Knows where everything is. Hopefully you will too which is more important. Early preparation lessens frustration.

There's nothing worse than forgetting where the music is located or the sound effects.

WOW WE'VE GOT THE LOT

Select Your Pictures By Holding Down The Ctrl Key. Then Slowly Drag Then Into The Film Strip

Soundtrack Drop music here. Double click to edit.

The Slides Now have a Nice Black Border On Either Side. The Fix: Open The Slide Tab. Select The Offending Sides. Go To Scale Slide. Hit Fill Frame. Slides Will Be 16:9 and the frame will be filled

Now For The Hard Part : The Music

The Music File is Now In the Sound Track Ready To Play.

Adjusting The Length of the Soundtrack

To Manipulate Sound Track Press TAB Key to ENLARGE THE TRACK

Hold Down CONTROL KEY to expose the ANCHORS. Now you can Fade or Decrease the Volume . Don't forget to SAVE as you go.

Fading The Main Track At The End

To Manipulate The Sound Track Use 2 Simple Keyboard Controls

- 1. Tap thTAB key once to reveal the enlarged MUSIC TRACK
- 2. Tap the Crtl Key to Reveal the the Control Points (Handles)
- 3. With Crtl key held down you can make a Triangle shape and with your mouse and its easy to fade the track or lengthen it.

The Final Step Is To PUBLISH Your Av. The Publish Tag Will reveal The Screen Below Choose The PC Executable for Comps and the DVD To Play Through A DVD Player

When you start to Publish the Exe File it asks where do you want to save it. Yep you guessed it. In the same folder you have the Pictures and Music.
